

Problem B. Número de Dígitos

Time Limit 2000 ms

Problem Statement

Given is an integer N . Find the number of digits that N has in base K .

Notes

For information on base- K representation, see [Positional notation - Wikipedia](#).

Constraints

- All values in input are integers.
- $1 \leq N \leq 10^9$
- $2 \leq K \leq 10$

Input

Input is given from Standard Input in the following format:

N K

Output

Print the number of digits that N has in base K .

Sample 1

Input	Output
11 2	4

In binary, 11 is represented as **1011**.

Sample 2

Input	Output
1010101 10	7

Sample 3

Input	Output
314159265 3	18
